Education

University of Central Florida

Expected Graduation: May 2028

Bachelor of Science in Computer Science | Minor Intelligent Robotic Systems

Orlando, FL

- Bright Futures Florida Medallion Scholar | **GPA: 3.726**
- Courses: Computer Science I, Object Oriented Programming, Computer Logic & Organization

Work Experience

METIL

Dec 2025 – Jan 2026

Research and Development Intern

Orlando, FL

- Selected for QuickStart Internship, a **Department of Energy's Nuclear Regulatory Commission** grant funded research project partnered with Oak Ridge Enhanced Technology and Training Center.
- Developed an **AI-driven hazard recognition simulation** using **Unity and C#** to visualize workplace hazards, increasing trainee hazard recognition accuracy by **25%** in the workplace.

Dell'Oro Group

Jun 2024 – Current

Web Developer

Remote

- Improved website reliability and data integrity by enhancing backend validation and optimizing **SQL Server** database structure, reducing customer-reported form and login issues by **30%**.
- Optimized **CMS** performance by refactoring **ASP.NET** and **C#** components and tuning database queries, achieving a **20%** reduction in page load time and smoother user experience.
- Authored and deployed **database migration scripts** to expand browser tracking capabilities, resulting in **20%** faster query response times for login reports.

Raytheon Technologies

Jun 2023 – Jul 2023

Future Ready Engineers Intern

Remote

- Developed an **AI-driven solution** to address unemployment challenges, creating a research-based PowerPoint presentation that demonstrated practical applications of emerging technology.
- **Presented research to an audience of 200+ engineers and mentors**, strengthening public speaking skills and showcasing the ability to communicate complex technical ideas effectively.

Leadership

UCF STEM Ambassador | Biography

Aug 2025 – Present

- Engaged **500+** K-12 students across **10+** schools through interactive STEM teach-ins and fairs.
- Developed **6+** technical presentations on **data structures, algorithms, and software design principles**.

Projects

UCF AI Club Website | Website | Source Code

Astro | JavaScript | TailwindCSS

- Built an Admin Dashboard to manage events and projects for the club website.
- Utilized **Figma** to recreate pages to collaborate with team members.

Music Match | Website | Source Code

Flask | SQLite | Python

- Coded the backend of a web based music guessing game, using **SQLite** for the database, an **iTunes Preview API**, and **Flask**.

Dell'Oro CMS

Bootstrap | SQL Server | .NET

- Contributed to a comprehensive **Customer and Content Management System** built with **ASP.NET MVC** for managing companies, contacts, programs, invoices, and file distribution.

Technical Skills

Languages: Python, Java, HTML, CSS, JavaScript, C/C#/C++

Developer Tools: AWS, Postman, Jupyter Notebook, Git/GitHub, Azure, npm, WordPress

Libraries/Frameworks: Flask, SQLite, MongoDB, ReactJS, NodeJS, ExpressJS, Bootstrap, .NET, SQL Server
